Congratulations on your purchase!
To get optimum performance of your MTS-3000 Marching Tenor Drum Stand, please read this Instruction Manual before playing.
**Base Section Assembly (Fig.1)**

1. **Using on Flat Surface (As shown in Fig. 2)**
   1. Loosen the Wing Nuts on the Stoppers of the Stable Legs.
   2. Slide the Stoppers to the end of the Legs to the Rubber Tip, and tighten the Wing Nuts.
   3. Loosen the Wing Bolt on the Upper Bracket of the Movable Leg.
   4. Slide the Upper Bracket up and adjust the position until the base stands straight up, and tighten the Wing Bolt.

2. **Using on Uneven Surface (As shown in Fig. 3)**
   1. Loosen the Wing Nuts on the Stoppers of the Stable Legs.
   2. Slide the Stoppers to the end of the Legs to the Rubber Tip, and tighten the Wing Nuts.
   3. Loosen the Wing Bolts on the Upper and Lower Bracket of the Movable Leg.
   4. Slide the Upper Bracket to the top of the pipe, and tighten the Wing Bolt.
   5. Slide the Lower Bracket and adjust the position until the base stands straight up, and tighten the Wing Bolt.

**Top Section Assembly (Fig.5)**

1. Loosen the Wing Nut of the Die-Cast Joint of the Base.
2. Insert the top section as shown, and tighten the Wing Nut and the Key Bolt on the Stop Lock.
3. Set the Stability Arm as shown, and tighten the Wing Bolt.

**Note**
1. Do not set the Stability Arm for the Trio set-up.
2. For height adjustment, loosen the Wing Bolt on the Die-Cast Joint and the Key Bolt on the Stop Lock, and slide the Top Section. Tighten the Wing Bolt on the Die-Cast Joint and the Key Bolt on the Stop Lock when desired height is achieved. Do NOT make height adjustment with the Tenor Drum mounted on the stand.
Setting the Tenor Drum (Fig.6)

1. Spread the Tenor Arms as shown.
2. Loosen the Wing Bolt on the Stability Arm, and extend the Arm to the position where the Receiver does not touch the Tenor Drum.
3. Insert the Tenor Arms into the J-Rod Brackets of the Back Bar on the Tenor Drum.
4. Adjust the position of the Receiver so that it is placed under the central Tenor Drum Spacer, and tighten the Wing Bolt on the Stability Arm. (Fig.7)

Note
- The tenor drum can be tilted by adjusting the height of the Slide Shaft. Press the Stop Lever to decrease height of the slide shaft. To increase height of the slide shaft, push up underneath it with your fingers. (Fig.8) DO NOT make adjustments with the tenor drums mounted on the stand.

Fig.7

Fig.8

CAUTION
- Do not use on unstable or sloped surfaces, as it could cause the stand to fall, resulting in damage and/or injury.
- Do not move the stand with the tenor drums mounted on the stand.
- Before use, check all Stop Locks to assure they are properly positioned and secured.
- Do not mount the Tenor Drums (except the Trio set-up) without the Stability Arm. The Tenor Drums could become unstable and could cause damage and/or injury.
- Periodically check all Wing Nuts, Wing Bolts and the nuts under the Tenor Arm to assure they are tightened securely.
- When making adjustments, support and control the parts being adjusted to prevent them from falling or pinching fingers that may be in the way.
- When folding the legs, be careful not to pinch your fingers between the leg and the stand.
- When handling tubular hardware, do not put your fingers into the tubes to prevent injury to your fingers.
